2013 – 2014

Bühler Holding AG, Innovation Lab at R&D Food Processing
Calvin Grieder, chairman and former CEO
- Managed a $30k budget to conduct industrial research including the conception, design, and validation of food processing machines that are sold for profit
- Designed the framework and motor suspension for a novel and now commercially available single screw extruder
- Visited customers in Northern India to test prototypes for controlled and cost-effective oil spraying of pulses on site

Zurich, CHE
2012 – 2013

ETH Zurich, Autonomous Systems Lab
Prof. Roland Siegwart
- Designed Ship Inspection Robot, a robust, cheap, and easy to operate inspection tool for the maritime transport sector intended to reduce costly inspection time in dry docks
- Contributed to an innovative overlapping wheel configuration (patented!) for overcoming a broad variety of obstacles encountered in cargo ships including I-shaped stiffeners
- Led the research team of ten interdisciplinary undergraduate students, oversaw the $15k budget, negotiated with manufacturers and suppliers, reported to investors and experts
